Info Plus⁽⁺⁾ AccountingSM presents PassKeyper ToolKitTM sensitive data-management system

PassKeyper ToolKitTM is a spreadsheet-based system that helps users accumulate, organize, secure, and easily access "sensitive" data from their computer desktop. The Tool KitTM was designed for users needing help in tracking and organizing the numerous account numbers, on-line user IDs, unique passwords, website addresses, security codes, prescription numbers, expiration dates, customer support phone numbers, and related notes and comments that accumulate at work and at home.

The PassKeyper Tool KitTM stores business information in one section of the sheet, and personal data in another, so it can be used for both personal and business use. Users create the Layout that they desire for each section by either selecting from 25 pre-built topic areas, or by adding their own unique topic title. Colors are used for each title, so that users can associate a color with a topic – which, with an extensive set of information, makes it easier to locate desired information.

Using the instructions provided, users can insert website links (hyperlinks) directly into the PassKeyper ToolKitTM. They can then locate and copy account IDs and/or passwords before clicking directly into the related website – where they can then easily "paste" the required data. Additionally, by including credit card and bank account information in the ToolKitTM, they can speed up the speed and accuracy of online ordering by simply copying and pasting that information into their online order as well.

The user can store the file on their desktop and utilize Excel's file password features to keep their information protected. The developer of the product, Diane C.O. Gilson, CPA says:

"Several years ago I realized that I was having a difficult time keeping all of my security codes, account numbers, passwords, websites, and other important reference information under control. The "sticky note" and scratch paper method of tracking that information was not only inefficient, it was just plain frustrating! I was spending way too much time locating the information that I needed and I was also worried that it would fall into the wrong hands.

I searched the Internet, but just couldn't find any product that did everything that I wanted, so I developed and refined this approach for my own use. And now that I have all my critical information in one place, I find that I use my ToolKitTM several times a day. When I saw that many of our clients and friends have the same problem as I used to have, I decided to share this solution..."

The PassKeyper ToolKitTM sells for \$49.95, includes a User's Guide & Samples, and is available for instant download at www.Store.InfoPlusAcct.com.

In addition to the development of accounting support products, Info Plus AccountingSM PC focuses on helping clients achieve their business and financial goals by maximizing the value of an essential management tool, their accounting system. This is accomplished by providing accounting, and QuickBooks[®] reporting, consulting, design, and training services through on-site visits or via the Internet.
